

## PRESS RELEASE

**Spotify has never sounded so good - in every room!**

**Experience synchronized Spotify streaming in all rooms with Raumfeld Wi-Fi speakers.**

Berlin, April 26, 2016 - Raumfeld, the leading provider of Wi-Fi speakers from Berlin, announces today the multi-room support for Spotify, the world's largest streaming service. Using the Raumfeld app, customers can add as many speakers as desired, then connect and play music directly through the Spotify app. With access to the world's best music selection, Raumfeld customers will be able to play the best of Spotify on high-quality speakers with high fidelity streaming from every room in their home.

### Product Details:

- True hi-fi quality sound in all rooms for Spotify customers
- Music selection and control via the Spotify app with all features
- Raumfeld multi-room is also available on the Spotify desktop app
- Perfectly synchronous playback for several speakers in the same or different rooms

## **Experience Spotify everywhere - on the road and at home in every room**

Services such as Spotify have changed the use of music - every song is available at any time. Raumfeld's multi-room function further expands this freedom now in every room in the apartment or home. Through control of the Spotify app, it is possible to seamlessly switch from playing through headphones to Raumfeld speakers, like magic. Come home, remove headphones, select the Raumfeld speaker in the Spotify app and listen instantly.

## **Optimum sound for any room**

From the compact, splash-proof One S to the floorstanding Stereo L speakers, Raumfeld offers over seven different Wi-Fi enabled full-blown hi-fi speakers, including two sound solutions for the TV, the Sounddeck and Soundbar. With the full Raumfeld speaker lineup, customers can find the right speakers for any room size or application. Existing audio equipment can be connected with Raumfeld speakers via the integrated connector system.

## **Pricing and Availability**

The Spotify multi-room feature is configured in the free Raumfeld app and is available for download today. In order to use Spotify multi-room with Raumfeld speakers, a premium subscription is required. Every Raumfeld customer has the opportunity to test the Spotify Premium subscription for one month free.

###

## **About Raumfeld**

Raumfeld was founded in 2008 in the belief that streaming is the future of music listening. Since then, Raumfeld has created a multi-room WiFi audio system for the enjoyment of a nearly limitless selection of music from private collections and the cloud. The German-engineered speakers support lossless digital files and play them back in true high fidelity. All system functionality - including a selection of popular music streaming services - can be intuitively controlled via a free app for iOS and Android smart devices.

In 2010, Raumfeld was acquired by Teufel Audio. The Berlin manufacturer's over 35 years' experience creating quality loudspeakers is expressed in Raumfeld's premium audio hardware. The coming together of sophisticated streaming technology and high quality loudspeaker construction results in a mature system for seamless multi-room streaming with hi-fi playback.

In 2015, Raumfeld was awarded the Red Dot Award for best product design in recognition of a style that is both sophisticated and distinctive.
